

Skin Growth and Blemish Removal

GENTLE

NON-MEDICAL

NON-SURGICAL

PAINLESS

ESTHETIC

PROVEN SAFE FOR OVER 20 YEARS

• Performed by

**Prof. Adiel Tel-Oren,
MD (Europe), CCN,
DACBN, LN, DC (ret.),
DABFM, DABOM,
FABDA, DABCT (c)**

What are skin growths and blemishes (skin lesions) that can be removed?

Moles/Nevi: pigmented or non-pigmented protrusions (from neurological irritation or solar exposure, or affected by genetics)

Skin tags: many pigmented or non-pigmented thin-based protrusions (usually from hormonal imbalance)

Senile hemangiomas: small to large red "blood blisters" (usually from capillary fragility and damage)

Keratoses: hard scaly protrusions (many types - age, genetics, and sun related), occasionally pre-malignant

Other lesions: warts/condylomas (genital/anal/cutaneous), xanthomas (fatty white "dots"/areas near the eyes), etc.

Many blemishes are **congenital** (existing from birth) as **birthmarks** are—and **cancer may start within them!**

Cost

The treatment charge is \$75-\$150 (for the FIRST lesion), based on size, location, and complexity; the second lesion is \$35-\$75; the third is \$25-\$50; and additional lesions are \$15-45 each (quantity discount applies).

All net income is donated to educational & environmental charities.

We respect financial hardship.

Although few doctors are experienced in this proven approach, Dr. Tel-Oren has used it successfully for over 20 years worldwide, on tens of thousands of patients of all skin types. He will tell you what to expect with each type of blemish removed.

For appointments, contact:

Why remove them?

Appearance No scarring, pitting, or regrowth in the vast majority of cases. Excellent results on the face. Very minimal scarring with flat, deeper pigmented (riskier) lesions.

Safety Reduced risk of skin cancer. No more watching moles for dangerous changes, when riskier, invasive, scarring procedures (that may spread cancer) become justified.

Prevention Reduced neurological irritation to the brain and spinal cord from asymmetrical skin growths and protrusions. Skin should be smooth!

Comfort No more catching of moles on clothing, jewelry, or combs (in scalp growths).

Convenience Usually requires a single treatment (a few minutes). No medical facility needed. No cutting, stitching, burning, or freezing, with their risk of infection and scars.

Guarantee In rare cases of regrowth or incomplete results, there is no charge for re-treatment.

How are they removed? (also see pg. 2)

Dr. Tel-Oren lightly applies to the lesion his safe, effective non-medical liquid—modified trichloracetic acid (similar, yet gentler than the one mentioned in the *AMA Journal, April 8, 1972, p. 210*; and *Obstet. & Gynec. audio-digest Vol. 20 #2, Jan. 23, 1973*). Even small children can tolerate the slight burning sensation (similar to a mosquito bite). The lesion's nutrition is restricted by the liquid, which causes the circulation to constrict. A scab forms in a few days, then drops off in a few weeks, leaving esthetically pleasing skin. The best results are achieved with growths on the face (any size!). Mild de-pigmentation may occasionally occur on the arms, legs, & torso, especially when melanin-containing or cancer-prone flat areas are treated. Any deeper layer of pigment that might remain (a rare occurrence) can be safely retreated, as no blood vessels are penetrated.

Patient Instructions

Before Treatment

1. Please relax. The treatment is safe, effective, and essentially painless (even children and babies handle it well).
2. Show your skin growths and blemishes to Dr. Tel-Oren. He will decide how many can be treated in one session and **which ones should be treated first**. Or, if he feels it's in your best interest, he may refer you to a skin specialist.
3. After inspecting your skin, Dr. Tel-Oren will tell you the cost of the treatment. You can then decide whether to proceed. Alternately, **you can benefit from specifying your budget at the beginning of the visit** (saving the doctor time); he will then provide treatment worth 20% above and beyond your specified budget.
4. If you proceed, Dr. Tel-Oren will gently apply his liquid on the growths or blemishes. Please hold still! You will feel a slight burning sensation—like a mosquito bite—lasting a few minutes.

After Treatment

1. First 12 hours: **please keep the treated area dry** (no shower)! In the first 2-3 hours, the treated area will shrink and change color, usually paler with a red halo (hyperemic reaction). The blood supply to the area is constricting, causing the malnourished cells to die. After 12 hours, you can shower/rinse the scab briefly as **the scab must not absorb water until it falls off** (no prolonged sink, bath, swimming pool immersion). To prevent or reduce scarring, makeup must be removed briefly with minimum water!
2. After 3-5 days: a hard scab will form on the treated area. **Do not rub, scratch, or pick it** (after showering, gently pat it dry). If you pull off the scab before it is ready, a new scab will form, but healing will be delayed (with minimal scarring). If it itches, apply a cold pack or ice in a plastic bag. Keep it dry!
3. After 12-15 days: the scab will fall off naturally, leaving smooth new skin (flat, pigmented, deeper lesions or pre-cancerous keratoses will take much longer to fall off and may scar a bit). Any redness or discoloration will improve over time. If the mole regrows (very rare), or if additional pigment remains, **there is no charge for re-treatment**.

About Dr. Tel-Oren (www.ecopolitan.com/doctor-t)

Adiel ("Dr. T") Tel-Oren, MD (Europe), CCN, DACBN, LN, DC (ret.), DABFM, DABOM, FABDA, DABCT (c), is a holistic scientist who educates doctors and the public about nutritional and environmental medicine, functional medicine (science-based holistic approaches to diagnosis and therapy), and disease prevention via truly natural lifestyle (tempered by today's environment) and dietary modifications.

Dr. T, a Medical Doctor trained in Europe and the USA (licensed in Europe), a Doctor of Chiropractic (trained in the USA, now retired), and a Licensed Nutritionist (USA), is board-certified with the American Board of Oxidative Medicine, the American Clinical Board of Nutrition, the American Board of Functional Medicine, and with the American Board of Chelation Therapy (candidate). He is a Professor & Certified Clinical Nutritionist with the Clinical Nutrition Board of the International and American Association of Clinical Nutritionists; a Fellow of the American Board of Disability Analysts; and member of the ACA Council on Nutrition. He is President Emeritus of the University of Natural Medicine (Santa Fe, New Mexico), where he is Dean of Medical Sciences and Professor of Functional and Nutritional Medicine.

Dr. T is founder and president of: FDH Foundation - promoting cutting-edge scientific knowledge and technologies that empower people to prevent and reverse disease and certifying Biological Dentists, Electro-

Magnetic Pollution Remediators (www.EMFPollution.com), and Health & Nutrition Coaches and consultants locally and internationally; of Integrated Healthcare Clinics (1994-2000) - www.integratedHealthCare.org - the first multi-disciplinary, multi-practitioner clinic integrating holistic and allopathic medical services under one roof; and of Ecopolitan (www.Ecopolitan.com) (2001) - the first sustainable, ecologically-sound non-profit restaurant offering 100% organic vegan uncooked cuisine, Wine & Juice Bar, Oxygen, Infrared Sauna, detoxification & healing "hostel" (www.Eco-Stay.com), Educational Community Center, and an Eco-Shop - selling non-toxic natural home and body products, professional supplements, and packaged and bulk raw foods. Dr. T promotes "EcoRaw Living" as a model for optimal cellular health and the principles of sustainability. He provides online nutritional advice and Lab Tests for most health challenges and sees patients internationally using resources from Ecopolitan (CDs/DVDs, online seminars, Certification Diplomas for Chefs and Nutritionists, food preparation classes, foraging trips, eco-adventures, and treatment modalities). Dr. T has consulted for various commercial, military, government, and community organizations, and is currently authoring books, Online Health & Detoxification Programs, and university courses about nutrition and wellness. Beyond his many lectures, radio and TV interviews, Dr. Tel-Oren's clinical work worldwide focuses entirely on Nutritional, Environmental, and Functional Wellness.

For honest, myth-busting, in-depth discussions on diet, health, and nutrition—offered free of charge by Dr.T—please visit www.TheTruthAboutYourFood.com

About The Ecopolitan Eco-Health Network (Join us at www.ecopolitan.com and get a surprise gift!)

The Ecopolitan Community is a group of people around the world who are committed to the Mission of Ecopolitan. They combine their wisdom, knowledge, passion and enthusiasm to organize events, lectures, and other gatherings around the world in the name of health and wellness. There are people at our Headquarters in Minneapolis, and others throughout the world making things happen. It was founded by Dr. Adiel Tel-Oren, but it has grown to be a thriving International community, and if you are interested in learning how you, too, can become a vital part of what we do, and how our projects can support your own development, career and future training, please contact us. We are always eager to meet more people like you who genuinely care about health and the environment.

It's a big job to turn this world around, but with your help, we can do it.
